KRONOS WORLDWIDE REPORTS SECOND QUARTER RESULTS

DALLAS, TEXAS...August 3, 2005...Kronos Worldwide, Inc. (NYSE:KRO) today reported net income for the second quarter of 2005 of \$32.9 million, or \$.67 per diluted share, compared with net income of \$284.8 million, or \$5.82 per diluted share, in the second quarter of 2004. For the first six months of 2005, Kronos reported net income of \$54.3 million, or \$1.11 per diluted share, compared with net income of \$294.6 million, or \$6.02 per diluted share, in the first six months of 2004. The primary reason for the difference in net income between the periods is due to certain income tax benefits recorded in the second quarter of 2004, as described herein.

Net sales of \$311.7 million in the second quarter of 2005 were \$15.9 million, or 5%, higher than the second quarter of 2004. Net sales of \$603.5 million for the first six months of 2005 were \$44.4 million, or 8%, higher than the first six months of 2004. Both increases are due to the net effects of higher average TiO2 selling prices, lower sales volumes and the favorable effect of fluctuations in foreign currency exchange rates, which increased sales by approximately \$10 million and \$21 million, respectively.

The Company's TiO2 segment profit (see description of non-GAAP information below) for the second quarter of 2005 was \$59.2 million compared with \$40.1 million in the second quarter of 2004, and was \$107.2 million for the first six months of 2005 compared with \$66.4 million for the first six months of 2004. Segment profit improved due to the net effects of higher average TiO2 selling prices, higher production volumes and lower sales volumes. Furthermore, fluctuations in foreign currency exchange rates favorably impacted segment profit comparisons by approximately \$2 million and \$3 million for the quarter and year-to-date periods, respectively. Segment profit in the second quarter of 2004 includes \$6.3 million of income (\$4.1 million, or \$.08 per diluted share, net of income taxes) related to the settlement of a contract dispute with a customer.

The Company's average selling prices in billing currencies (which excludes the effects of fluctuations in the value of the U.S. dollar relative to other currencies) during the second quarter and first six months of 2005 were 11% and 10% higher than the respective periods of 2004. Expressed in U.S. dollars computed using actual foreign currency exchange rates prevailing during the respective periods, the Company's average selling prices in the second quarter of 2005 were 15% higher than the second quarter of 2004 and 14% higher for the first six months of 2005 compared with 2004. Reflecting the continued implementation of price increase announcements, the Company's average selling prices in billing currencies in the second quarter of 2005 were 2% higher compared to the first quarter of 2005.

The Company's second quarter 2005 TiO2 sales volumes decreased 10% from the second quarter of 2004, as sales volumes were lower in all markets. TiO2 sales volumes for the first six months of 2005 decreased 7% from the first six months of 2004. The Company's TiO2 production volumes were 4% higher in each of the second quarter and first six months of 2005 as compared to the same periods in 2004, with operating rates at near full capacity in all periods. The Company's finished goods inventories at June 30, 2005, which represented 2 months of average sales, were higher compared to March 31, 2005. Production volume in the first six months of 2005 was a new record for Kronos.

The Company's results in the second quarter of 2005 include a securities transaction gain of \$5.4 million (\$3.5 million, or \$.07 per diluted share, net of income taxes) related to a gain on the sale of the company's passive interest in a Norwegian smelting operation.

Interest expense to affiliates for the second quarter and six months ended June 30, 2004 relates primarily to the Company's \$200 million 9% long-term note payable to affiliates issued in December 2003, which was prepaid in November 2004. Other interest expense increased due primarily to higher levels of indebtedness resulting from the issuance of an additional (euro)90 million principal amount of the Company's Senior Secured Notes in November 2004. Additionally, other interest expense increased due to relative changes in

foreign currency exchange rates, which increased the U.S. dollar equivalent of interest expense on the Company's (euro)285 million Senior Secured Notes issued in June 2002 (and outstanding during the second quarter of 2004) by approximately \$400,000 and \$1 million in the second quarter and first six months of 2005, respectively, as compared to the year-ago periods.

As previously-reported, the Company's income tax benefit in the 2004 periods includes a second quarter \$268.6 million tax benefit (\$5.49 per diluted share) related to the reversal of a deferred income tax asset valuation allowance attributable to the Company's income tax attributes in Germany (principally net operating loss carryforwards).

The statements in this release relating to matters that are not historical facts are forward-looking statements that represent management's beliefs and assumptions based on currently available information. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it cannot give any assurances that these expectations will prove to be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly impact expected results, and actual future results could differ materially from those described in such forward-looking statements. While it is not possible to identify all factors, the Company continues to face many risks and uncertainties. The factors that could cause actual future results to differ materially include, but are not limited to, the following:

- o Future supply and demand for the Company's products,
- o The cyclical nature of certain of the Company's businesses,
- o Customer inventory levels,
- o Changes in raw material and other operating costs,
- o The possibility of labor disruptions,
- o General global economic and political conditions,
- o Competitive products and substitute products,
- o Customer and competitor strategies,
- o The impact of pricing and production decisions,
- o Competitive technology positions,
- o Fluctuations in currency exchange rates,
- o Operating interruptions,
- o The ability of the Company to renew or refinance credit facilities,
- o The ultimate outcome of income tax audits, tax settlement initiatives or other tax matters,
- o The ultimate ability to utilize income tax attributes, the benefit of which has been recognized under the "more-likely-than-not" recognition criteria,
- o Government laws and regulations and possible changes therein,
- o The ultimate resolution of pending litigation, and
- o Possible future litigation.

Should one or more of these risks materialize (or the consequences of such a development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those forecasted or expected. The Company disclaims any intention or obligation to update or revise any forward-looking statement whether as a result of changes in information, future events or otherwise.

In an effort to provide investors with additional information regarding the Company's results as determined by accounting principles generally accepted in the United States of America ("GAAP"), the Company has disclosed certain non-GAAP information which the Company believes provides useful information to investors:

- o The Company discloses percentage changes in its average TiO₂ selling prices in billing currencies, which excludes the effects of foreign currency translation. The Company believes disclosure of such percentage changes allows investors to analyze such changes without the impact of changes in foreign currency exchange rates, thereby facilitating period-to-period comparisons of relative changes in average TiO₂ selling prices in the actual various billing currencies. Generally, when the U.S. dollar either strengthens or weakens against other currencies, the percentage change in average TiO₂ selling prices in billing currencies will be higher or lower, respectively, than such percentage changes would be using actual exchange rates prevailing during the respective periods.

- o The Company discloses segment profit, which is used by the Company's management to assess the performance of the Company's TiO₂ operations. The Company believes disclosure of segment profit provides useful information to investors because it allows investors to analyze the performance of the Company's TiO₂ operations in the same way that the Company's management assesses performance. The Company defines segment profit as income before income taxes, interest expense and certain general corporate items. Corporate items excluded from the determination of segment profit include corporate expense and interest income not attributable to the Company's TiO₂ operations.

Kronos Worldwide, Inc. is a major international producer of titanium dioxide pigments.
